Database/Industry Tools & Software | GitHub, Git, Heroku, MAMP, Netlify, MongoDB, PostgreSQL, MySQL

PROJECTS

APPLICATIONS TRACKER

A web app that allows users to login with a secure entry using Bcrypt and Express-Sessions. Once logged in securely, the user then has access to all RESTful routes and can start by creating a job application file which will save securely to their profile. The user can enter in multiple properties to this Schema and the app will save the data for them to come back at any time with their login credentials. The user can also edit an entry as well as delete the entry in its entirety. This web app is deployed via Heroku.

Technologies: Node.js, Express, MongoDB (Atlas), Mongoose, HTML, CSS, Bootstrap, Heroku, Partials, EJS
